

THE FOUR VERDICTS ONLY ONE SAYS BUILD

THE GRID WE DRAW BEFORE WE QUOTE
ANYBODY

TWO QUESTIONS DECIDE EVERYTHING.

How often does the work repeat, and how much judgment does it take?

Where those two answers cross is your verdict.

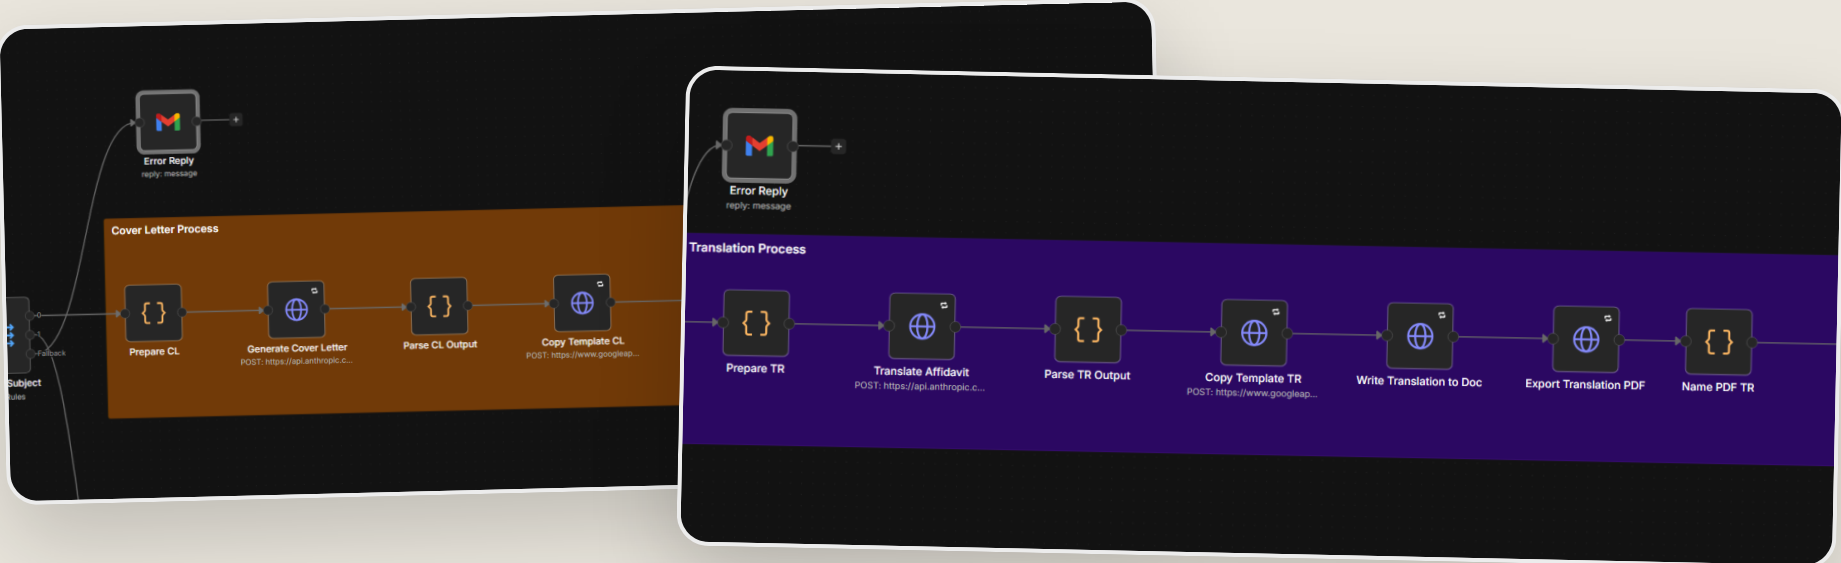

Automate, assist, hire, ignore.

VERDICT 1 A U T O M A T E

CONSTANT WORK.
CLEAR RULES.

Same steps every time, high volume, nothing surprising.

For a law firm we build for: the letters that go out **with every file.** Email lands, the draft assembles against their template, a person sends it.

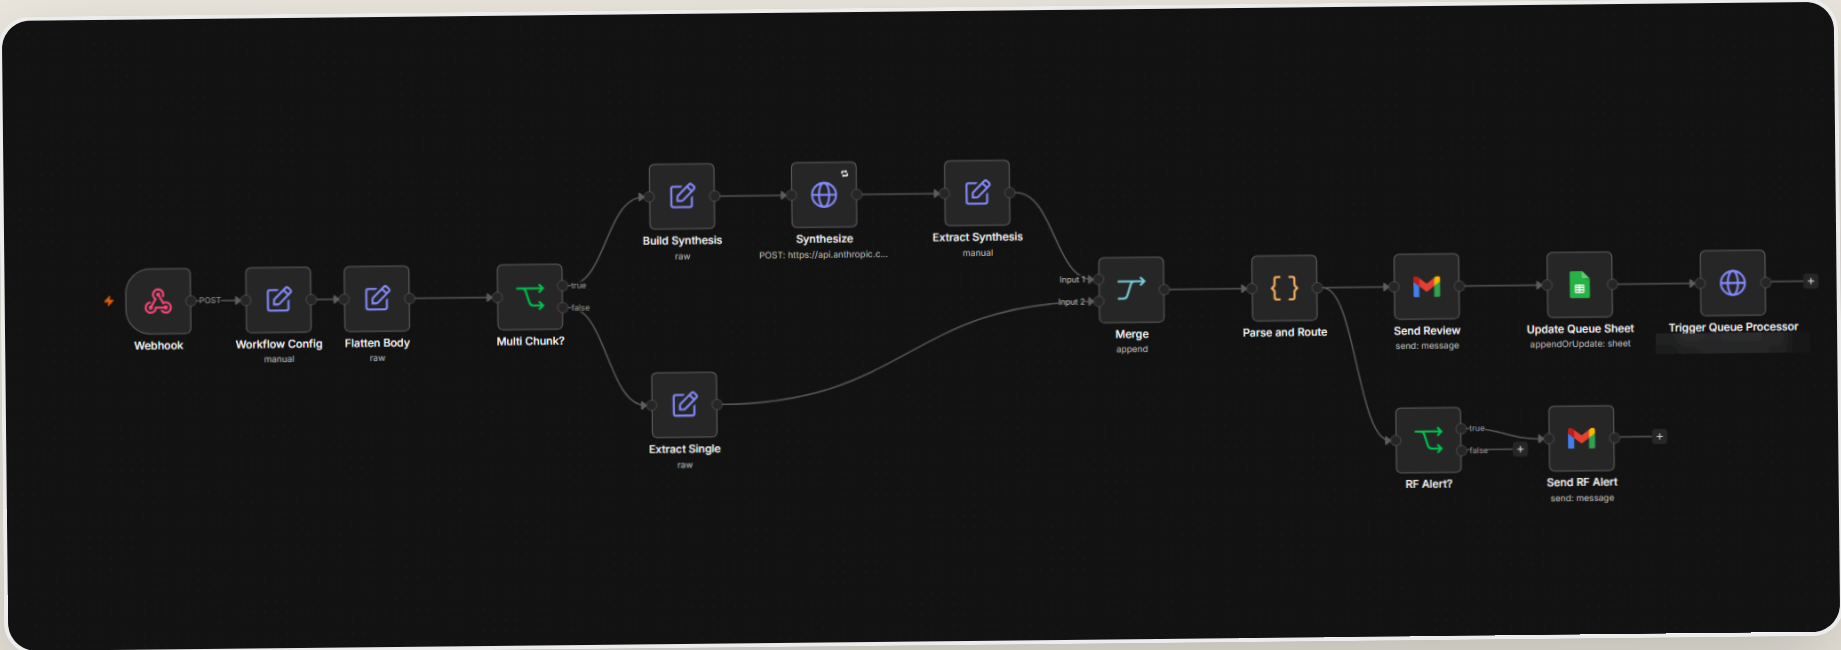

VERDICT 2

ASSIST

CONSTANT WORK.
JUDGMENT REQUIRED.

Constant, but somebody still has to think. So the system only gets half the keys.

A person signs off on every one. It never gets the last word.

VERDICT 3

HIRE

RARE WORK. JUDGMENT REQUIRED.

Twenty calls a day, mostly noise, a few that matter.
Knowing which is which is the whole job.

A good receptionist beats a bot, every time. We
say so on sales calls, and it costs us work.

VERDICT 4

IGNORE

RARE WORK. CLEAR RULES.

The task that comes around twice a year and annoys everyone both times.

The build will cost more than the task ever will.

Keep your money.

SO

HALF THE GRID

HALF THIS GRID SAYS DON'T BUY.

Two of the four verdicts protect your budget instead of spending it.

Any idiot can throw money at AI. The return comes from picking the right thing to point it at.

TRY IT

ONE TASK

PLOT ONE TASK BEFORE YOU SPEND.

Take the thing you were going to automate this quarter and run it through the two questions.

Most owners find something that has been sitting in Automate for years.
