

BLUEBRIDGE AI

Which parts of your business are actually ready for AI?

A 4-question test →

QUESTION 1

Is it repetitive?

If your team does it the same way every week, it's a candidate.

One-off judgment calls usually aren't.

QUESTION 2

Does it follow rules?

If you can teach the steps to a new hire, you can hand them to a workflow.

If it's all gut feel — not yet.

QUESTION 3

Is it eating real hours?

Automating a 5-minute monthly task isn't worth it.

A 2-hour task that runs every day? That's where the money is.

QUESTION 4

Is the input consistent?

Same kind of document, same fields, same format = ready.

Wildly different inputs every time = harder.

REAL EXAMPLE

Translating the documents for one legal case.

Repetitive ✓

Rule-based ✓

Hours-heavy ✓

Consistent inputs ✓

THE RESULT

~2

~3

hrs

per case, by hand

min

same quality,
reviewed

Reviewed and certified. The quality didn't drop — the waiting did.

NOTICE

What we did NOT automate:

The legal judgment.

AI handled the grunt work. The people kept the thinking.

THE HONEST ANSWER

**Some of your work is
ready today. Some isn't.**

The skill is knowing which is which.
