

THE AUTOMATION MATRIX

**4 kinds of work.
Only 1 verdict says
"build the
automation."**

Where real law-firm work landed →

THE GRID

Two questions decide everything

How often does the task repeat?

How much judgment does it need?

Four verdicts: Automate. Assist. Ignore. Hire.

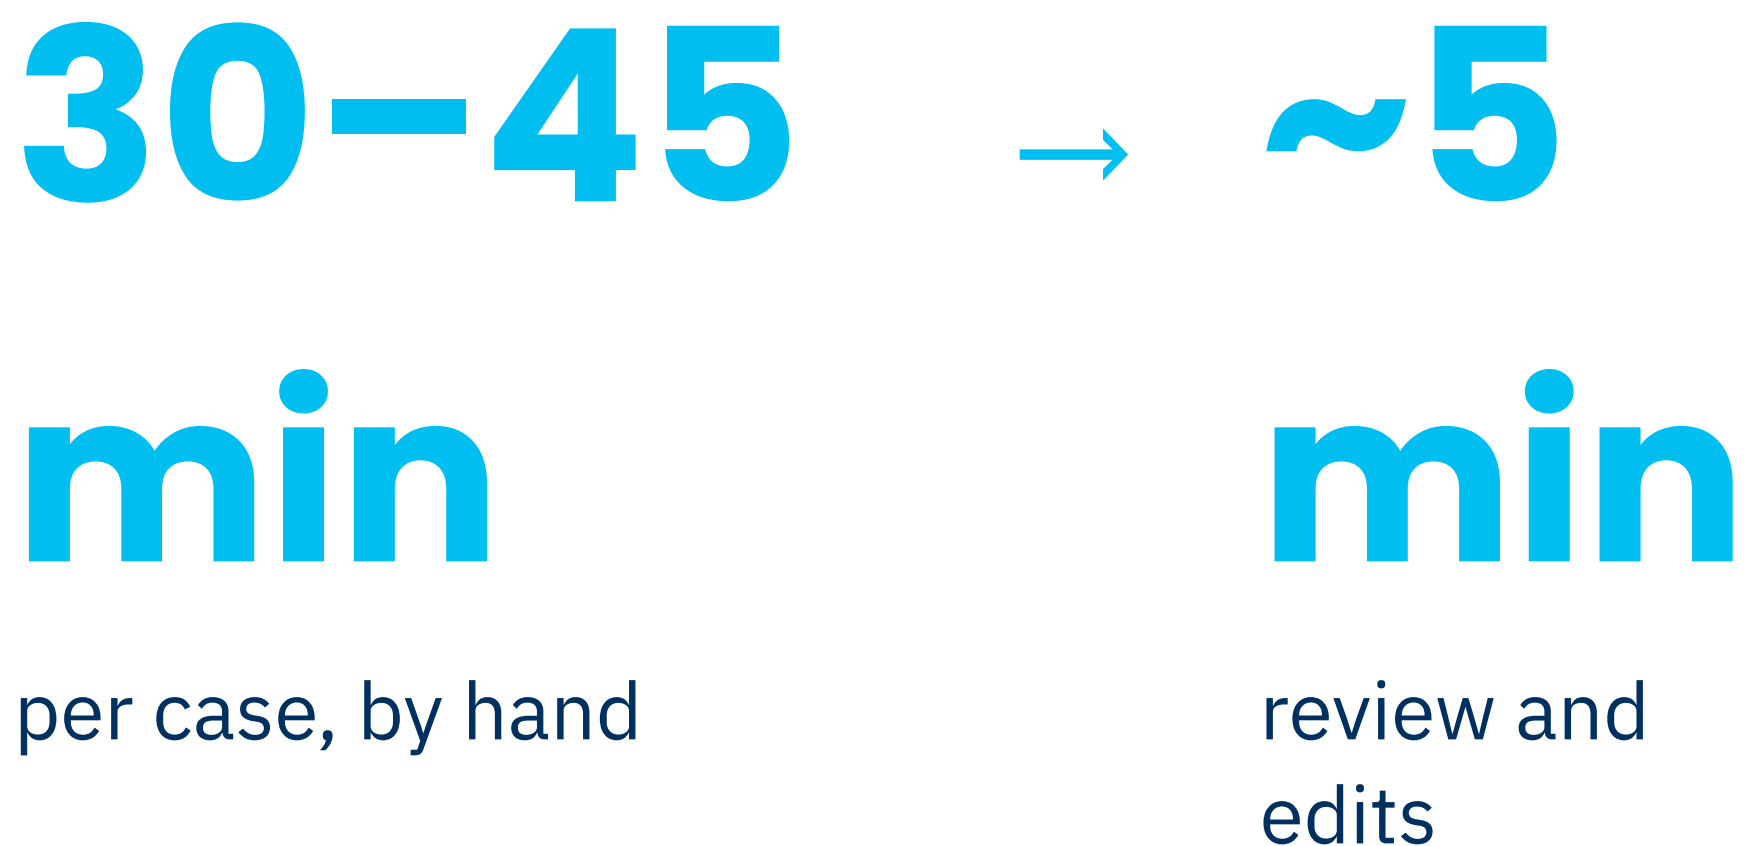

VERDICT 1 · AUTOMATE

USCIS waiver cover letters

Same steps every case. Clear rules, constant volume.

The bot drafts. A paralegal reviews and edits.

THE PAYOFF

Repetitive, rule-following, constant. That quadrant pays back fastest.

George, the packet-review bot

High volume, but real judgment. So George only gets half the keys.

More than 3 problems and the case goes back to a paralegal. An attorney signs everything.

VERDICT 3 · HIRE

Phone intake at 20 calls a day

Mostly sales calls, a handful of real leads.

A receptionist wins that job. We say so on sales calls.

VERDICT 4 · IGNORE

The task that happens twice a year

However annoying it is, the build would cost more than the task ever will.

Keep your money.

NOTICE

Half the grid says: don't buy AI

Two of four verdicts protect your budget.

That's not the framework failing. That's the framework working.

TRY IT

List your 5 most repetitive tasks

Run each one through the two questions.

Most owners find at least one that's been sitting in Automate for years.
